“ Dr. Dell cares for both the heads and the hearts of the students at OSSM; she showed me the aesthetics of protein folding and shepherded me through several bouts of teen angst. ”

Brenton Phillips, Yukon, OK - OSSM Class of 1994 - MS in Engineering, MIT

“Working at OSSM has taught me what can actually be accomplished in the education of students.” Ann Dell

Dr. Ann Dell has been with OSSM since 1991 and has taught Biochemistry, Genetics, and Molecular and Cell Biology to all 14 OSSM graduating classes. Ann also coordinates all of OSSM’s mentorship programs where she is responsible for finding professionals in the community who are willing to dedicate at least 4 hours a week to students. She also arranges busy schedules and provides transportation to and from mentor facilities. Ann has devoted much of her time and energy to OSSM students over the years and we are delighted to honor her as the first recipient of the Awesome Friends Faculty Award.
